I started playing in 1999, when the demo was just released and everybody was running around like headless chickens on Phobos or Coret. I became addicted because of my friendly neighbour, and to this day I still play at least a game of UT daily. The clan I was in won some stuff, too. We won a Eurocup trophy against Inzane that lives its present life as an ashtray, and some other miscellaneous stuff like hardware. Those were good times. Oh and free Clanbase t-shirts.

Right now I only play on one server, Rocketface. Rockets only, Face only, it doesn't get much lamer, but I enjoy it as much as tubgirl loves tub. That's a lot.
